ETHICAL HACKING LAP

Experiment 1: Linux Basic Commands in Kali Linux

Execute and display the results for the following commands in Kali Linux:

1. **rm command**
2. **users command**
3. **tree command**

Aim:

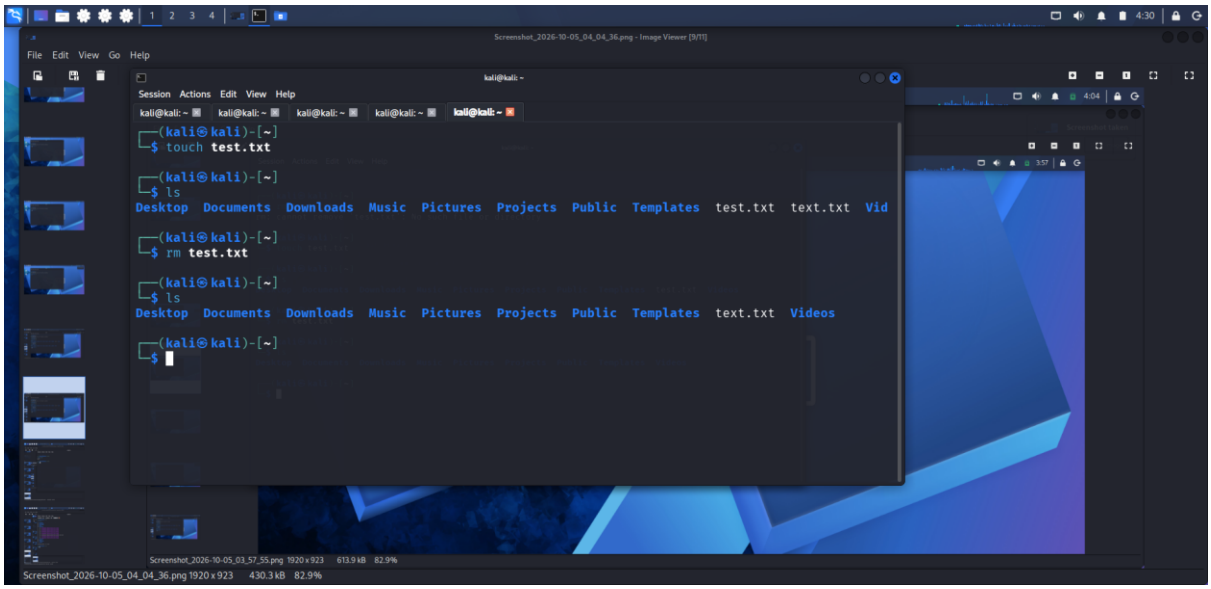

To execute the rm command in Kali Linux and demonstrate how to remove/delete a file

Procedure:

rm command:

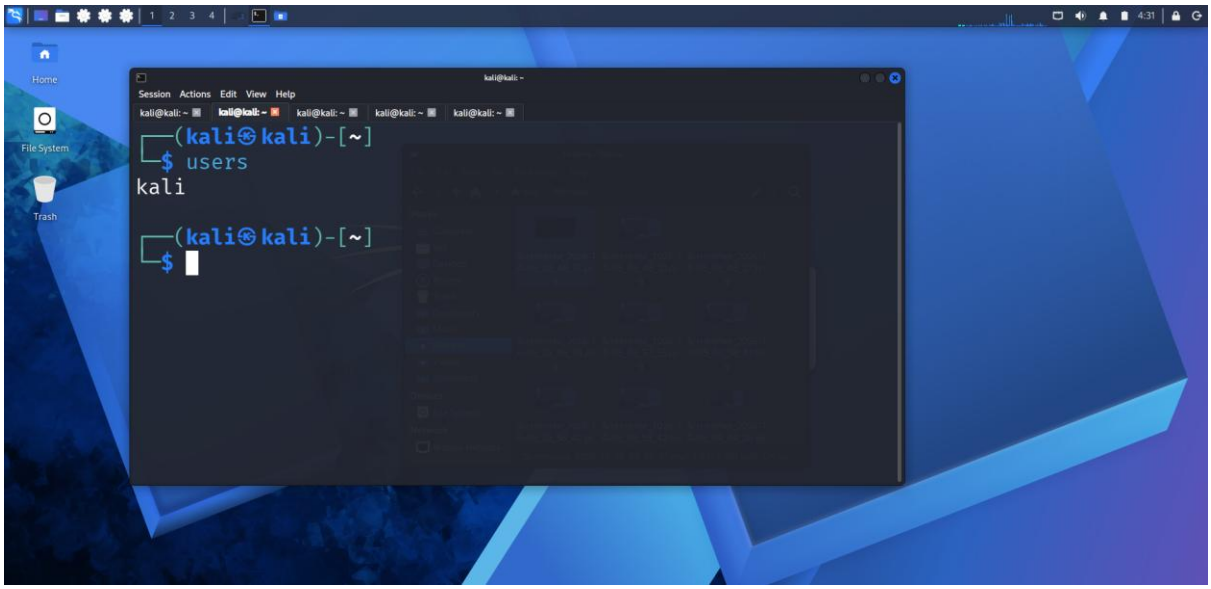

The rm (remove) command deletes files and directories in Linux.

OUTPUT:

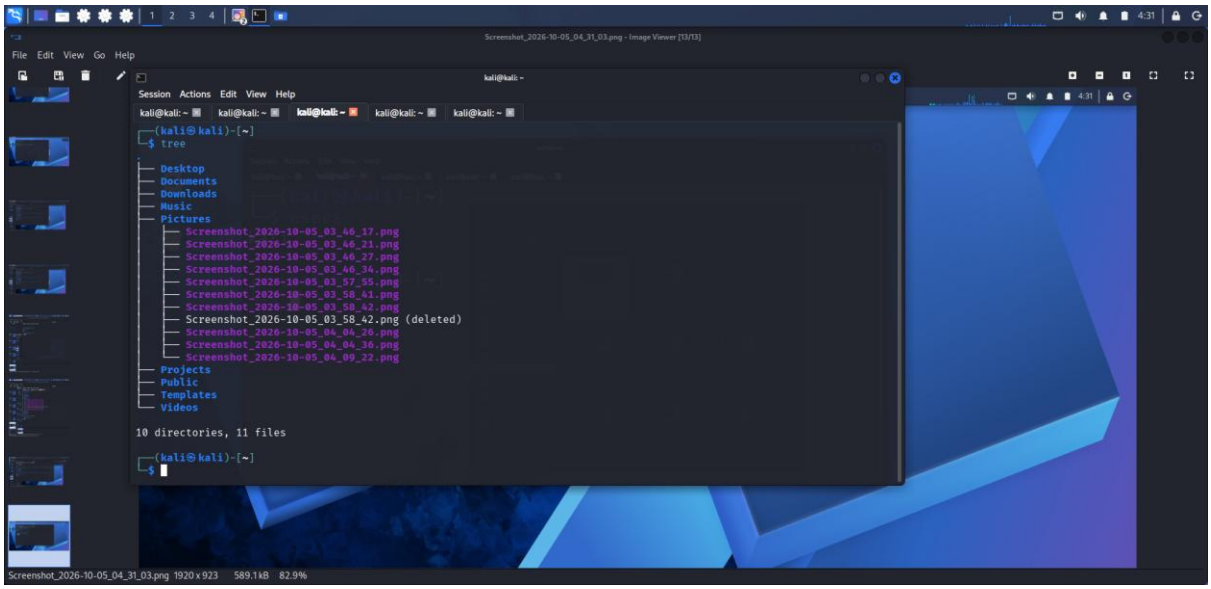

Users command:

The users command is used to display the usernames of users currently logged into the Linux system**.**

Tree Command:

The tree command is used to display files and directories in a tree-like structure

RESULT:

Thus, the **rm**, **users**, and **tree** commands were successfully executed in Kali Linux.
