EXERCISE – 11

Question

Execute and display the results of the following commands in Kali Linux Operating System:

1. Aggressive Speed Scan
2. Insane Speed Scan

Aim

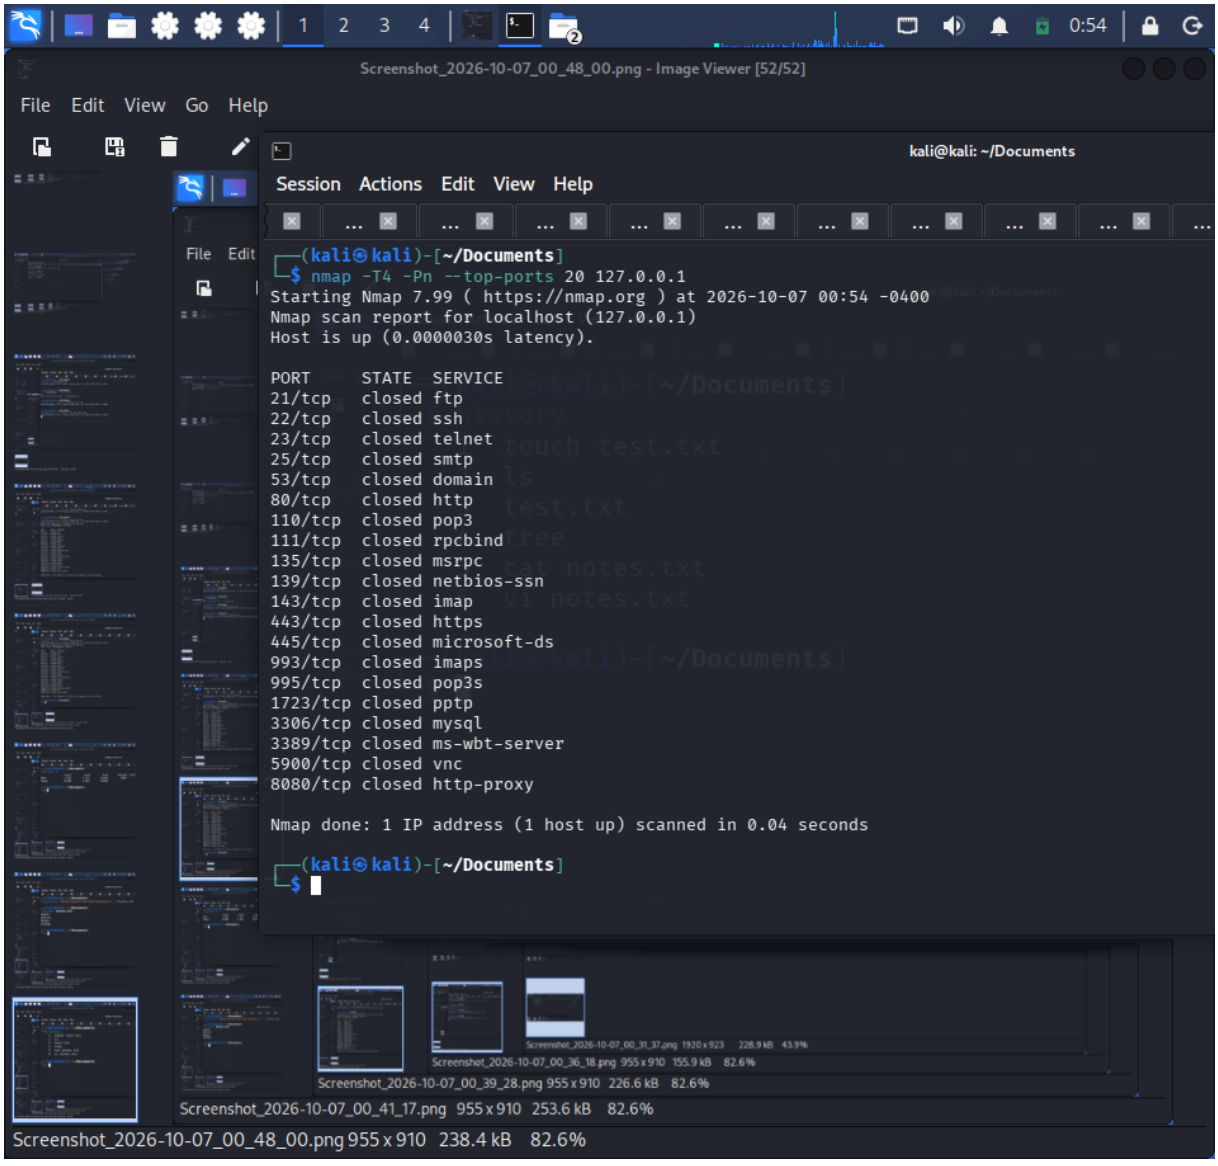

To execute and display the results of the rm, users, and tree commands in Kali Linux.

1) Aggressive Speed Scan

Command:

nmap -T4 -Pn --top-ports 20 127.0.0.1

Use:
Performs a **faster scan** by sending probes more quickly. It is useful when you want quicker results on a reliable network.

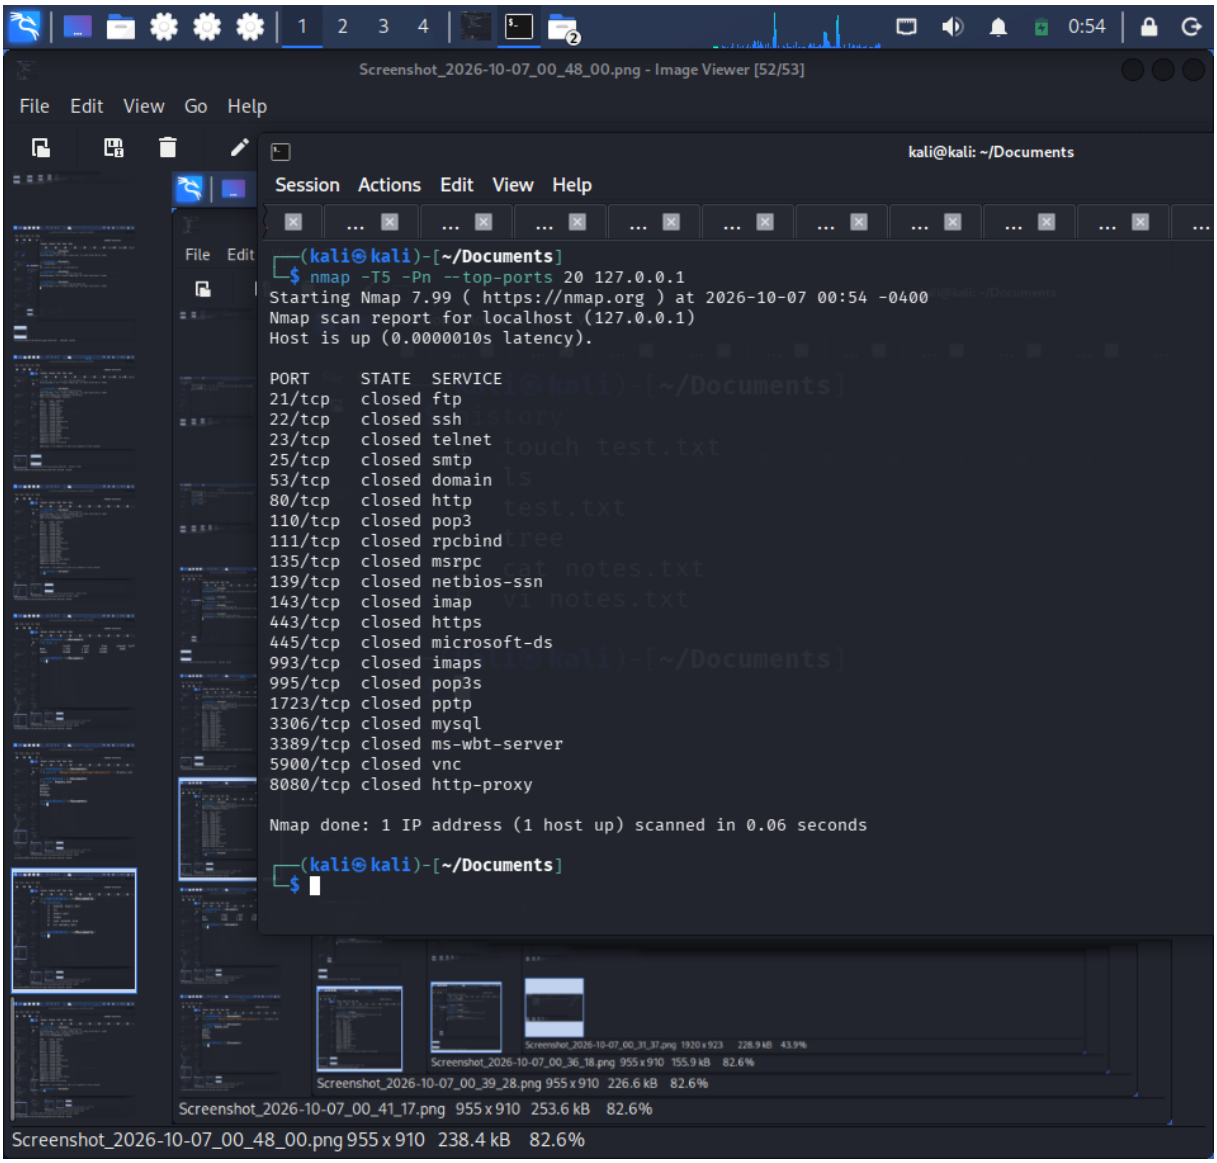

2) Insane Speed Scan

Command:

nmap -T5 -Pn --top-ports 20 127.0.0.1

Use:

Performs the **fastest Nmap timing scan**. It can generate more network traffic and may miss results on slow or unreliable networks.

Result

Thus, the rm, users, and tree commands were successfully executed in Kali Linux and their results were displayed.
