EXERCISE – 8

Question

Execute and display the results of the following commands in Kali Linux Operating System:

1. Service Version Detection
2. Aggressive Scan
3. Operating System Detection

Aim:

To execute and display the results of the rm, users, and tree commands in Kali Linux.

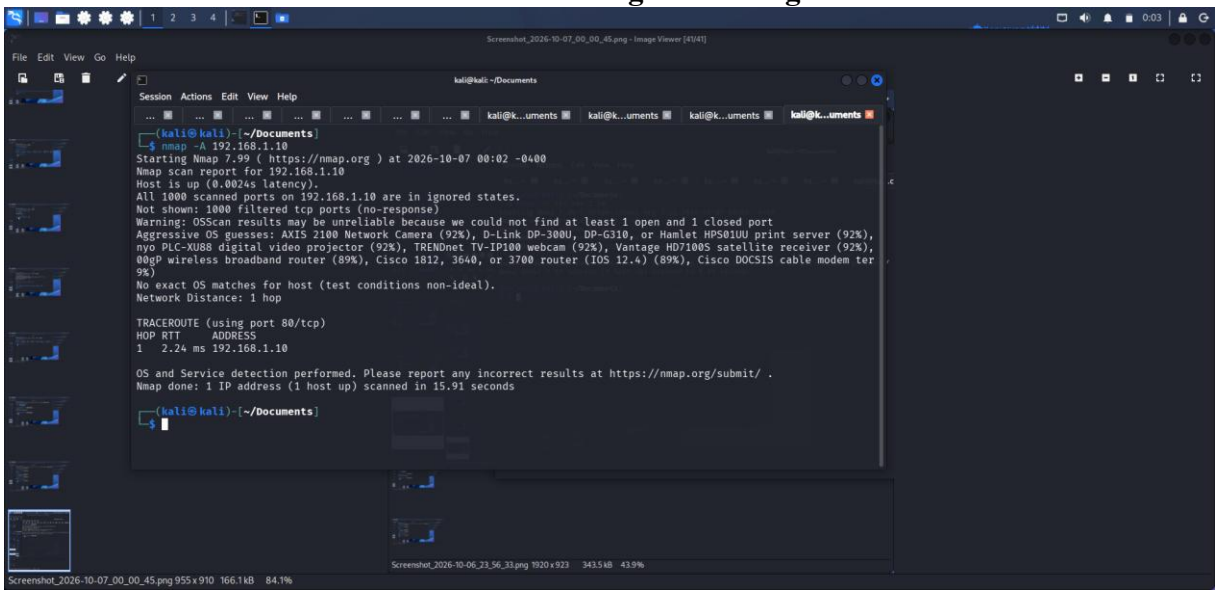

Service Version Detection

Command:

nmap -sV 192.168.1.10

Use:

Detects the services and their versions running on the target.

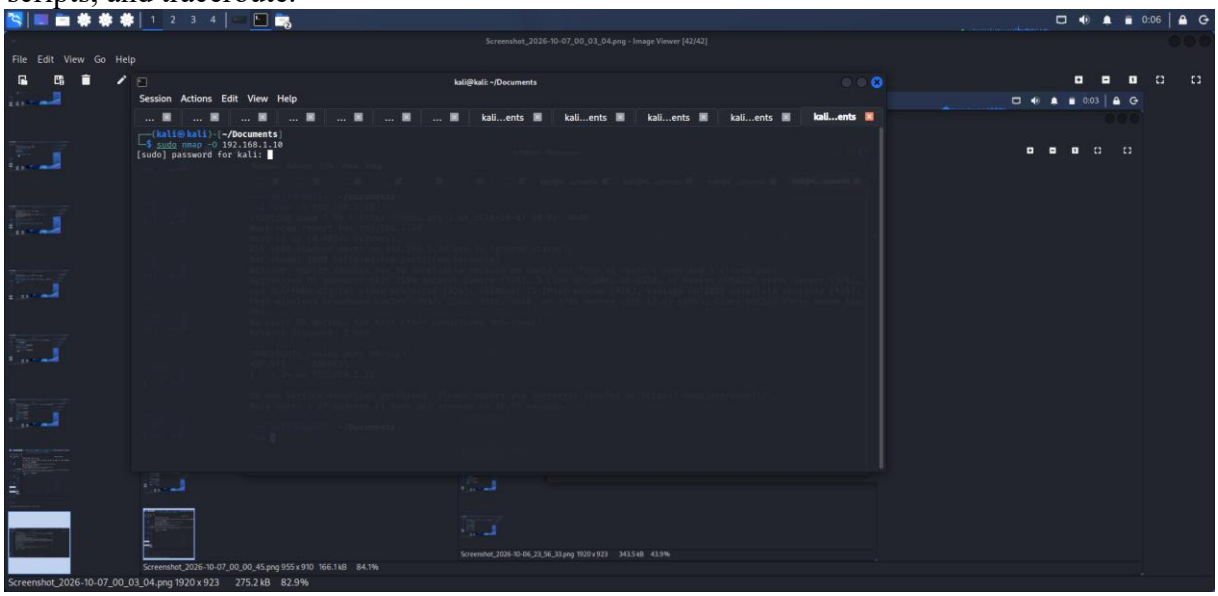

2) Aggressive Scan

Command:

nmap -A 192.168.1.10

Use:
Performs an **aggressive scan** to gather information such as OS detection, service versions, scripts, and traceroute.

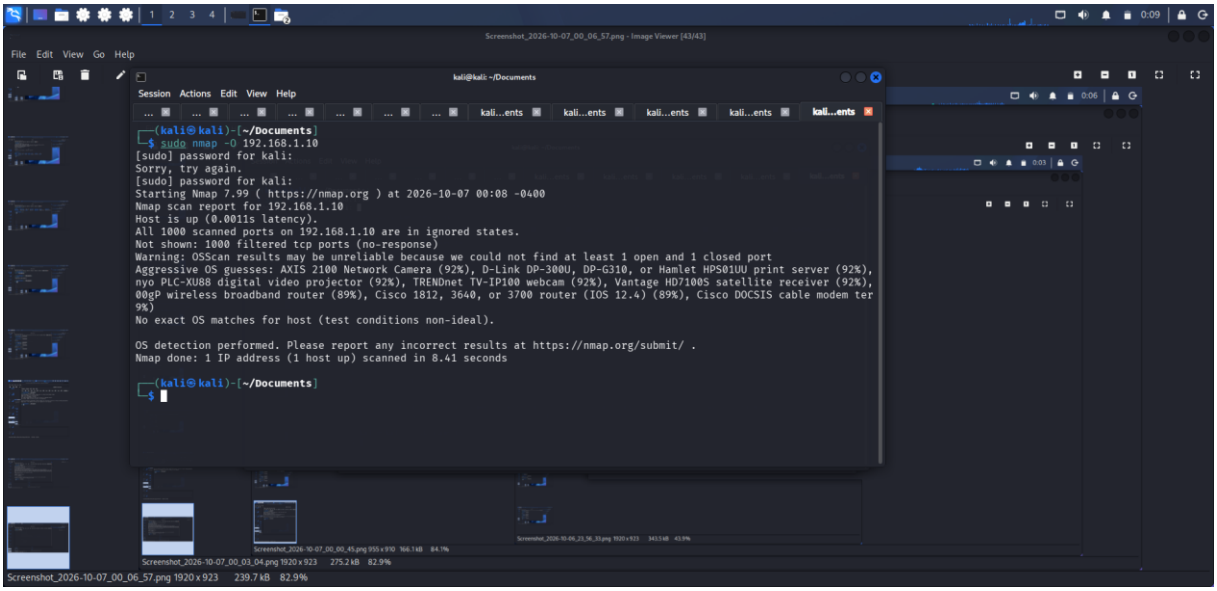

3) Operating System Detection

Command:

sudo nmap -O 192.168.1.10

Use:
Attempts to **identify the operating system** of the target machine.

Result

Thus, the rm, users, and tree commands were successfully executed in Kali Linux and their results were displayed.
