EXERCISE – 9

Question

Execute and display the results of the following commands in Kali Linux Operating System:

1. Polite IDS Evasion Aggressive Scan
2. Normal IDS Evasion

Aim:

To execute and display the results of the rm, users, and tree commands in Kali Linux.

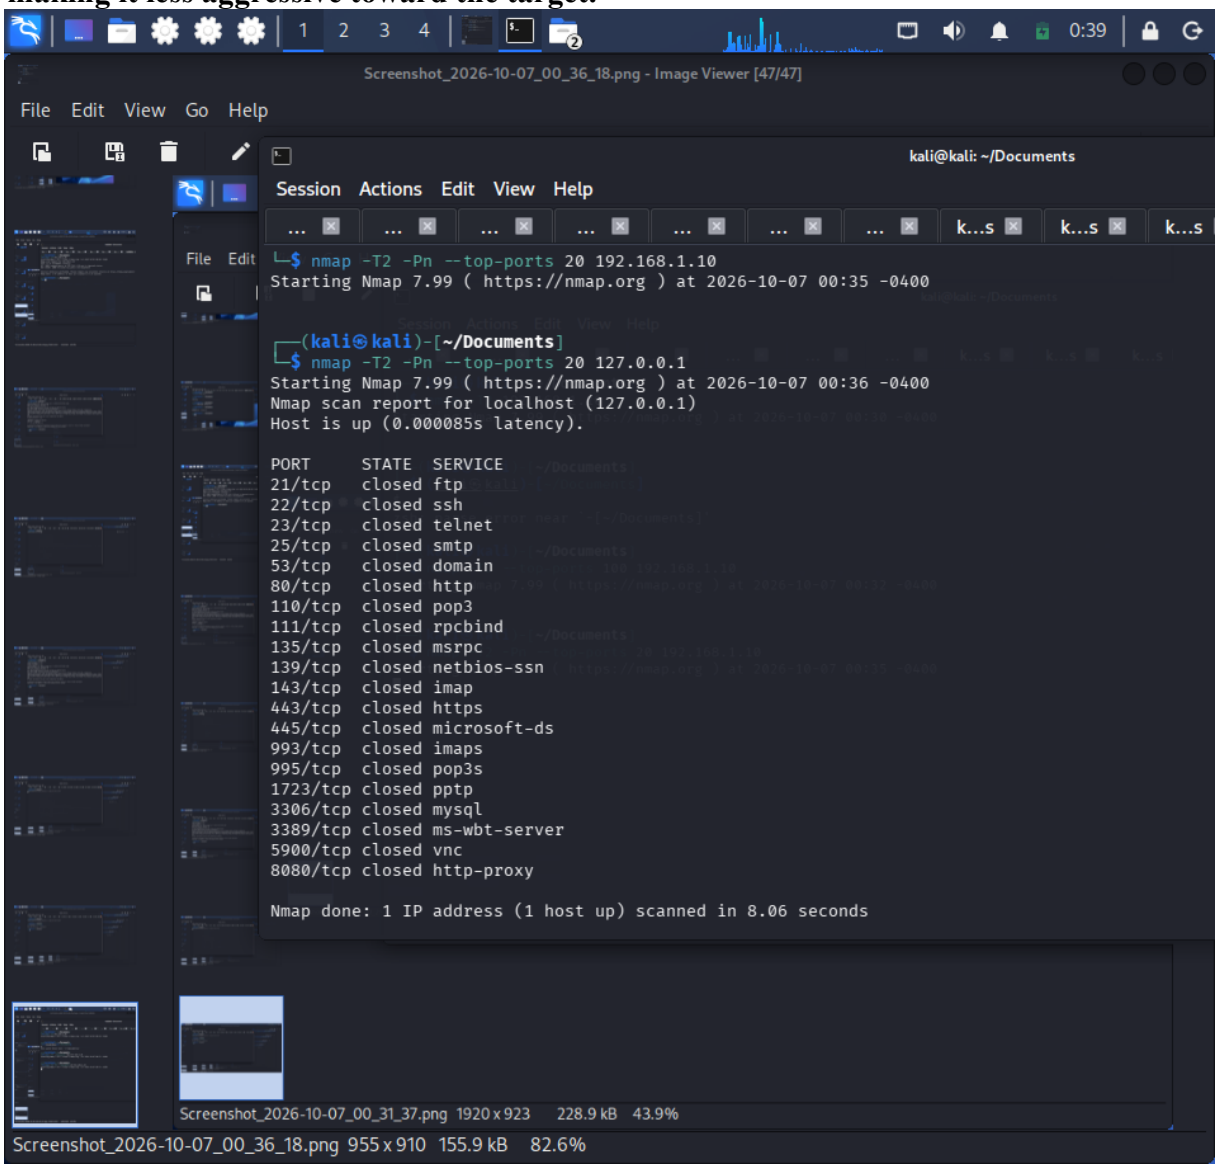

1) Polite IDS Evasion Aggressive Scan

Command:

nmap -T2 192.168.1.10

Use:

The polite (-T2) timing template slows down the scan and reduces network traffic, making it less aggressive toward the target.

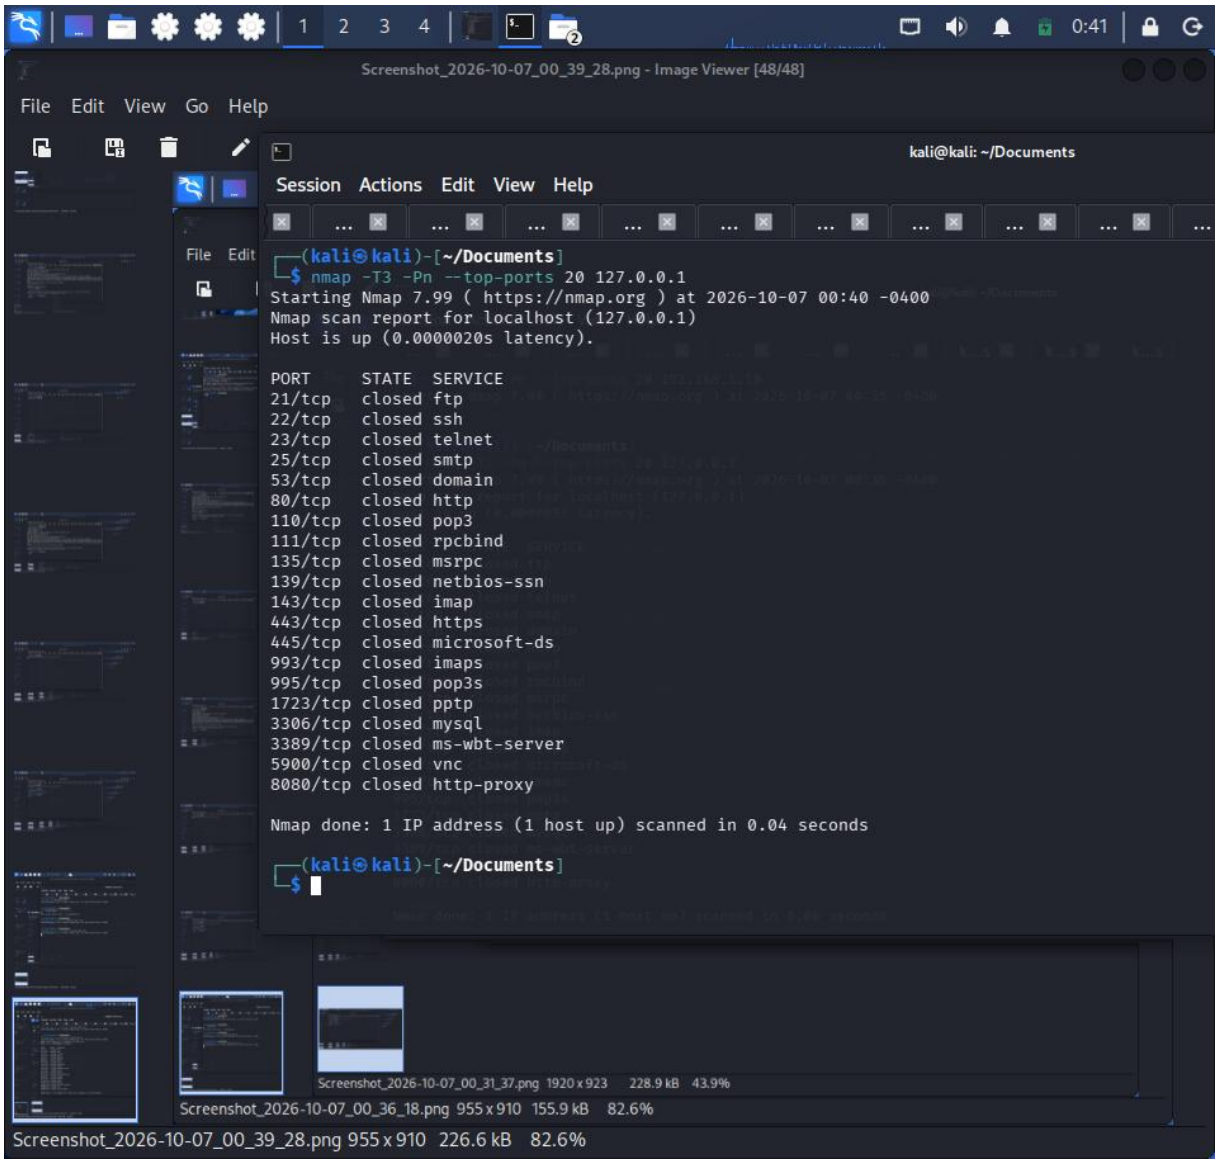

2) Normal IDS Evasion

Command:

nmap -T3 192.168.1.10

Use:
The **normal (-T3)** timing template performs the scan at the default, balanced speed.

Result

Thus, the rm, users, and tree commands were successfully executed in Kali Linux and their results were displayed.
